Quite Likely.

American women bathers with an inclination to embonpoint, it is stated, have taken to painting dimples on their knees. The report that a fashionable New Yorker who does not care for the water has created the necessary illusion by having a lobster painted on her toe is probably premature.—From Punch, London.

IN CHESTNUT TIME.

The cooked chestnut is not nearly so popular as it deserves to be. Any time or labor entailed in its preparation is amply repaid by the result.

Chestnut Custard.—Blanch, boil until soft, and mash.

Through a colander a quantity of chestnuts. To one cupful of the chestnut pulp add three egg yolks with one beaten white of egg, one cupful of milk and half a teaspoonful of vanilla extract, and sugar to taste. Pour into a buttered baking dish and bake slowly. Make a meringue with the remaining whites and two tablespoonfuls of sugar, and bake slowly on returning to the oven. Garnish with preserved cherries.

Imperial Chestnut Pudding.—Take one pint of chestnuts, one pint of almonds, two cupfuls of sugar, the yolks of six eggs, two cupfuls of cream, two cupfuls of boiling water, one pineapple or a can of the same, and one pound of candied fruit. Shell and blanch the chestnuts and cover with boiling water and cook until tender. Drain and press through a colander. Cut the candied fruit into bits, shell and blanch the almonds. Roll the sugar and boiling water for a quarter of an hour, then add the beaten yolks of the eggs, remove from the fire and beat until cool. Now add the fruit, cream, almonds, chestnut flavoring and a quarter of a cupful of orange juice. Mix well and freeze. Pack for five hours to ripen.

Mashed Chestnuts.—These may be served as a vegetable or as a cake filling. Put boiled, blanched chestnuts through a ricer, season with salt, butter and cream as for mashed potatoes. For puddings add flavoring, sugar and a pinch of salt.

Chestnuts and Ham.—Place alternate layers of thinly sliced cooked ham and mashed chestnuts in a baking dish. Season with minced marjoram and sage, salt and bits of butter to the top layer of chestnut pulp. Bake until brown on top.

HIS THANKSGIVING WISH

Boy—Jenny, I'd like to be round dead wild whole turkey in me stummock an' dat bill o' fare for a tombstone!

Thanksgiving Time.

When brimming barns reward the work-filled year,
When fuel-piles and bins bring indoor cheer,
When life and health have clung to those we love,
The normal human heart will look above
And thank a blessed Source for what He sends
In basket, store and intercourse with friends.

When through another year our nation's soul
Has triumphed though the war-waves madly roll;
When in our lives still live the patriot fires
To fan the which each loyal heart aspires;
When we all unashamed can face the world
And Stars and Stripes unblemished are unfurled—

Then and then always shall we deem it meet
To send aloft a prayer as incense sweet
For grateful hearts to feel and tongues to say
Feelings and words that fit Thanksgiving Day.

Sing on! God's goodness never can be told—

"The good die young," for good cannot grow old. L'Envoi

It has the Scrooge-like soul with accents of grief
Who sees our theme and grimly sneers
"Old Stuff!"
—Strickland Gilliam in Farm Life.

If we kept count of our blessings,
Every day would be a Thanksgiving
1927.

CHIMNEY OF UNIQUE DESIGN

Wales was the Tallest in Existence, and One of Most Remarkable Construction.

The tallest chimney in the world is in Wales, and is over two miles in length, and has a further distinction in that it has a brook running through it. It was built by a smelting company after the neighbors for miles around the plant had complained that unless something was done to alter the drift of copper smoke that destroyed vegetation and rotted the hoofs of farm animals, that they would take the plant apart brick by brick.

A famous engineer was called in, and after inspection of the plant, began a chimney that extended from the roof of the plant up a mountain side just back of the works. The chimney, in addition to crawling the two miles up the mountain, extends 100 feet up in the air. The brook was allowed to flow almost the entire length of the chimney, as it was found the running water would condense the smoke to a great extent. Once a year the chimney is swept, and a ton of precipitated copper is reclaimed. The tip of the smoking chimney can be seen for 10 or 50 miles on a clear day.
